HARVEST 2021

The 2021 harvest was long, fresh and rainy, starting in the second half of September. It was a year considered normal – and dry –, with productivity being above average, compared to the previous decade. It gave rise to musts of good quality, fresh and slightly less alcoholic.,

VINIFICATION

Manual harvest in 20-kilo boxes, with the entire bunch received directly at the mill, without stemming. The curls were crushed using the traditional foot tread method. Alcoholic fermentation occurred spontaneously, initially in lagar/granite press; after a gentle pressing, in stainless steel tanks. Malolactic fermentation also took place in stainless steel tanks.

AGING

10 months in stainless steel tanks.
